

BEN HEYMAN

Digital Product & AI Transformation Leader | Data, Platforms and Regulated Delivery

London / Surrey | +44 7485 052953 | ben.heyman@hotmail.co.uk | linkedin.com/in/benheymanai

PROFILE

I am a product and transformation leader with an extensive background in global banking and hands-on experience building AI products and automations. I help organisations get more value from technology, data and AI by identifying the right problems to solve, shaping practical products and programs, and keeping business, technology and data science teams aligned through delivery and adoption. I start with the underlying process and user need, test whether a proposed solution is valuable and feasible, and stay close to delivery until it works in practice.

AREAS OF EXPERTISE

Product & AI: Product strategy and discovery; data, analytics and AI-enabled products; Responsible AI, evaluation and controls.

Transformation & Delivery: Program and portfolio leadership; process and operating-model redesign; change, adoption and benefits realisation.

Leadership & Domain: Executive stakeholder leadership; cross-functional business and technology delivery; global financial services and capital markets.

PROFESSIONAL EXPERIENCE

INDEPENDENT PRODUCT & AI TRANSFORMATION LEAD | Selected engagements

UK / International

Jan 2025–Present

Advisory, product and hands-on build work applying AI, data and automation to operational problems.

- **Japanese services group (Jun 2026–Present):** Conducting executive interviews, process mapping and AI opportunity assessment under a 12-month retainer, creating a prioritised inventory to guide future investment and delivery.
- **Streetwise/Rhevia (Jan–May 2025/Jun–Jul 2026):** Joined as the first employee, defined the architecture and flows for road-safety sensor data, and built Power BI prototypes used in sales, funding and Department for Transport discussions. Re-engaged after the Rhevia rebrand to align an agentic reporting backend with user journeys, trusted data sources and data readiness, rationalising the backlog and testing the existing product.
- **Property services (Feb–May 2026):** Built a speech-to-text workflow that reduced reliance on offshore transcription, cutting turnaround times from two days to minutes, lowering external cost and accelerating report turnaround.
- **Wisp Daily (May–Jun 2026):** Designed, built, and launched a fully automated daily children's podcast app on the App Store using Claude Code, OpenAI, and ElevenLabs, embedding strict content and workflow guardrails.

CHIEF PRODUCT OWNER — SALES & TRADING DATA AND CREDIT ANALYTICS | Standard Chartered Bank

London

May 2022–Jan 2025

Owned product strategy and delivery for around 700 global Sales, Trading, COO and Credit users; led two Product Owners, two Data Analysts, two India delivery squads and a London developer within an annual budget of approximately US\$3m.

- Repositioned a largely retrospective sales-reporting platform around real-time trading opportunities and client-engagement signals, increasing monthly active usage from 55% to 88% in six months.
- Led predictive limit-utilisation analytics that replaced spreadsheet-based monthly reviews, identified underused client capacity and cyclical borrowing patterns, and validated approximately US\$250m of potential additional lending headroom.
- Delivered a Reuters news-sentiment MVP tested by Credit Analysts, enabling comparison of company, sector and regional risk signals.
- Introduced a formal intake and monthly investment process for a 12–15-person Data Science team, focusing capacity on use cases with demonstrable business value, technical feasibility and strategic relevance.
- Co-chaired the monthly Responsible AI Committee, approving, rejecting or setting conditions on initiatives with Risk, Platform and Technology stakeholders and contributing to governance standards.

VP, CEO OFFICE — CENTRAL PROGRAMME OFFICE | Credit Suisse

London

Jan–May 2022

Independent portfolio oversight within a central team covering approximately US\$2.5bn of annual change investment.

- Provided independent assurance and coaching across major change programs, typically around US\$100m, working with PMO teams, sponsors and business leaders to improve delivery discipline and keep investment aligned with strategic priorities.

PRODUCT & BUSINESS DEVELOPMENT LEAD — WEALTH PLATFORMS | Credit Suisse

Hong Kong and Singapore

Jan 2018–Dec 2021

Commercialisation, partnerships and external data integration for wealth and asset managers and family offices.

- Developed propositions for commercialising internal wealth-management capabilities, led Australian go-to-market activity to NDA stage with a major platform and owned regional product-risk classification.
- Led integration of Credit Suisse services and custody data with Prive, a Hong Kong platform aggregator, progressing the initiative to pilot and coordinating business, risk, data and technology requirements.

VP, REGIONAL NEW BUSINESS | Credit Suisse

Singapore

Dec 2013–Dec 2017

Regional Head of Finance New Business, then Operations New Business, before selection for the APAC team; managed 2–3 specialists and around 15 concurrent initiatives.

- Coordinated pre-launch assessment across 10–14 functions, keeping regulatory, control and operational requirements consistent throughout the product lifecycle; major initiatives included Shanghai Connect and UK-to-Asia legal-entity migrations.
- Challenged revenue and cost cases, tracked approval conditions, reviewed outcomes after go-live and led sensitive breach investigations; presented recommendations to C-suite executives and country heads.

EARLIER CAREER

VP, Program Manager - Asia Program Execution Group | Barclays

Aug 2011–Dec 2013

Led APAC balance-sheet restructuring to improve RWA efficiency through repapering and restructuring existing deals, chairing Trading, Sales and Risk forums. Also led a team of five on a post-LIBOR controls program across six Front Office businesses, deploying a new platform to 200 users within UK regulatory deadlines.

Project Manager - Transaction Management / Client Services Change | Deutsche Bank May 2006–Aug 2011

Redesigned global issuance to a just-in-time model, saving approximately €2m in annual custody costs, and rebuilt the X-Trackers trailer-fee operations and billing platform, reducing workflow time by approximately 90%. Transferred to Singapore in 2010 to run Client Services change across onboarding, KYC/AML and confirmations.

Business Analyst (Associate) → Project Manager (AVP), Operations | JPMorgan

Jan 2000–May 2006

Progressed from Six Sigma process improvement into project management. Led SmartStream SSR implementation across 35 EMEA custody accounts, improving reconciliation transparency and enabling later process migration to India; also supported the launch of Egypt and ran UK equity settlements.

EDUCATION & PROFESSIONAL DEVELOPMENT

BA (Hons) Business Studies (2:1), Bournemouth University

INSEAD — Transforming Business with AI (2024)

ICAgile Certified Professional (2023)

APPLIED TECHNOLOGY

Personally used: Power BI; Claude Code; OpenAI / ChatGPT; ElevenLabs; API-connected and agent workflows; speech-to-text automation; prompt, structured-output and guardrail design.

Led through technical teams: Predictive analytics and machine-learning products; real-time Sales & Trading data platforms; Reuters sentiment; custody-data integrations; sensor-data architecture and enterprise workflow platforms
